A Letter of Recognition

In appreciation for my bright renewed smile, I share my experience, as grateful patient of Dr. Andrew Lewis:

When I had a sudden onset of a tooth ache and needed to find a new dentist after losing confidence in my current provider, a colleague recommended Dr. Lewis.

Because of my extensive dental history (including orthodontics--three different times, gum grafts, bridges, tooth implants, and a complete dental reconstruction following jaw surgery to address TMJ pain), I was looking for very skilled dentist. I was relieved when I was able to get an emergency appointment the next day with Dr. Lewis, who determined I needed a root canal and referred me to a specialist.

After the root canal I returned to Dr. Lewis' office for my annual cleaning. The oral hygienist gave me the best cleaning I have ever had in my 63 years, gentle and thorough using the latest technology. Next, Dr. Lewis gave me the most comprehensive dental evaluation that I have received in years, which included recommendations for another gum graft to preserve my tooth implants. Again he referred me to an exceptional specialist.

Meanwhile, I told Dr. Lewis my previous dentist had attempted to camouflage my chipped and stained front teeth, but half of the prostheses had broken off within days and when repaired broke off again a day later. I asked what he suggested. After an extensive assessment, we agreed that porcelain veneers would provide the long lasting and cosmetic results I was hoping for.

At the completion of this process, I am so pleased with the outcome! In addition to being a very personable and gentle dentist, he is truly an expert, who is extensively trained with the experience, skill and talent that makes him an exceptional practitioner. He has a conservative approach, but with the knowledge and know-how to provide the solutions that are required (however extensive) to resolve complex problems. As a surgical RN, I know the value of a skilled doctor; moreover, I, also, appreciated when the practitioner excels to the level of an artisan within their specialty, as does Dr. Lewis. The results I received exceeded my expectations. The fit, natural appearance and quality of work is amazing. I join with my colleagues at the University Med Center in enthusiastically recommending Dr. Lewis.

Sincerely,

Vicki Marshall, RN, CNOR
